

Shasons

4 JAW INDEPENDENT CHUCKS

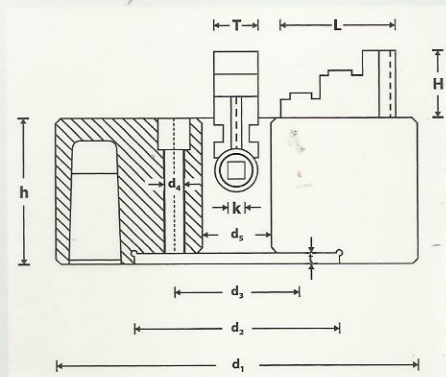

- BODY is of high strength cast iron, designed to provide maximum rigidity with minimum weight & overhang.
- JAWS are case hardened and ground where required. Jaws are of sufficient length to prevent tilt and rapid wear. It has diamond cut on bigger V for extra rigid grip.
- PINIONS are of alloy steel with uniform hardness. Square threads of pinions are precisely cut to reduce pitch error resulting in a smooth movement. These are ground on the diameter & are interchangeable.
- LOCKS are of alloy steel & ground on the fitting diameter for precise fit. Locks are interchangeable.
- SPARES are easily available for quick & better service.

Standard Accessories:

- Key Handle
- Mounting Bolts

- All Components of **Shasons** Chucks are stamped to avoid duplicacy.
